

Private Dining Room Information

Thank you for your inquiry regarding Hy's Steak House's private dining options.

We are very proud of our recently renovated private dining room which is located in our upstairs dining room, now known as "The Executive Level." This private dining area will accommodate up to 25 guests. The room features a flat screen television monitor with WiFi capabilities, CD/DVD player and laptop connectivity.

The "Executive Suite" is available for private parties on the following terms:

- \$1600.00 minimum (food and beverage) Sunday through Thursday; \$3000.00 minimum (F&B) Fridays, Saturdays, and select holidays.
- Gratuity: 18% on food and beverage (minimum charge) to be paid to your servers.
- Hy's can create a menu to fit your special occasion or you can choose from our set menus below
- Private entertainment requires prior written approval of Hy's management so that other diners will not be disturbed.
- Deposit/Credit Card Policy: To reserve our private room a credit card or cash in the amount of \$25.00 per guest is required.
- The deposit will be applied to your bill as a credit.
- Cancellation fee: 100% of the deposit will be charged if the event is cancelled within 7 days of the event.
- Other charges: If special arrangements are required, such as a special order cake, flowers, or other embellishments requested by the host, that charge will be added to your bill

A/V Capabilities

Hy's *private dining area* is fully equipped to host a wide variety of events such as business meetings, pharmaceutical and medical presentations, family celebrations and special occasions in an

elegant setting with full hi-tech capability. This *private dining area* features its own video and audio systems, independent lighting control and a retractable partition for privacy.

Video System: A high definition (HD) 60 inch, 1080P resolution flat screen LED TV with Wi-Fi capability is the centerpiece of the video system in the *private dining area*. Convenient access to multiple industry standard inputs such as HDMI, VGA, RS-232, Ethernet, PC Input, USB, composite video, RGB video among others (all with audio) is provided. A wireless connection to the flat screen via Apple TV provides another convenient way to present from a tablet, PC or any other Wi-Fi enabled device.

An articulating mounting system provides a wide range of tilt and angle adjustments to insure crisp, clear and fatigue free viewing. The screen can be retracted when not in use and is designed to appear as virtual artwork displaying a limitless variety of photos, graphics, video or custom logos.

Audio System: The audio system consists of high quality full-range ceiling speakers that provide clear, intelligible sound for live speech, video playback, recorded music or live music from the lounge. A dedicated input for the *private dining area* is provided for connection of music sources such as an iPod or CD player. The audio system and speakers in the *private dining area* can be used and controlled separately from the rest of the room or combined to cover the entire upstairs area.

A professional quality wireless microphone system is also provided with a low-profile headset microphone that enables hands free use. A wireless or wired hand-held microphone can also be used.

Internet: Wi-Fi access, both wired and wireless LAN connections are available.
